Instruktion
Instructions Manual

Vejledning for Model LK 164S/M

INDHOLD

Foldet lampe i filt, hertil elophæng med messing rør. Baldakin og krog for ophæng medfølger.

VEDLIGEHOLD

Messing er lakeret og kan gøres ren med en fugtig klud.

Filt lampen kan støves af med børste eller støvsuges på lav styrke. Pletter kan fjernes forsigtigt med en våd klud.

Hvis lampen i forbindelse med rengøring går lidt løs af stativet, skubbes filtskærmen blot på igen. Der kan evt. rykkes lidt på plisséerne for at fordele dem jævnt så lampen hænger lige igen.

LYS

Vi anbefaler at bruge en LED pære.

Model 164S: E27, max. 20 W LED, anbefalet 1055 lumen

Model 164M: E27, max. 20 W LED, anbefalet 2500 lumen

Følg anbefalinger for miljørigtig håndtering og bortskaffelse.

MONTAGE

El-ophænget monteres i ringen i skærmen.

Baldakin og/eller krog bruges til loftmontage efter behov.

BRUG/MATERIALE

Da lampen er produceret i tekstil (Viskose filt), skal der holdes sikkerhedsafstand til stearinlys og lignende emner med flammer/høj varme. Høj varme kan gøre filten blød og dermed deformere lampen på sigt.

Da materialet er lavet af fibre der kartes og derefter nålefiltes sammen, vil der være en variation i filt sammensætningen og dermed farvetonen, samt nistre/tråde der kan have forskellige farver.

Instructions for Model LK 164S/M

CONTENTS

Folded lamp in felt, electric suspension with brass tube. Canopy and hook for suspension included.

MAINTENANCE

Brass is varnished and can be cleaned with a damp cloth.

The felt lamp can be dusted with a brush or vacuumed on low power. Stains can be carefully removed with a wet cloth.

If the lamp comes off the frame a little during cleaning, simply push the felt shade back on. The pleats can be moved a little to distribute them evenly so that the lamp hangs straight again.

LIGHT

We recommend using an LED bulb.

Model 164S: E27, max. 20 W LED, recommended 1055 lumen

Model 164M: E27, max. 20 W LED, recommended 2500 lumen

Follow recommendations for environmentally friendly handling and disposal.

ASSEMBLY

The electric suspension is mounted in the ring in the shade.

Canopy and/or hook are used for ceiling mounting as needed.

USE/MATERIAL

Since the lamp is made of textile (Viscose felt), a safe distance must be kept from candles and similar objects with flames/high heat. High heat can soften the felt and thus the lamp in the long run.

Since the material is made of fibers that are carded and then needle felted together, there will be a variation in the felt composition and thus the color tone, as well as threads that may have different colors.
