Plinth

As versatile as it is timeless, the marble Plinth serves the dual purpose of being a beautiful, sculptural piece on its own and highlighting whatever objects rest upon it. The honed marble carries an air of sophistication and elegance to elevate any space.

Designed by Norm Architects as a tribute to the particular beauty of marble, the Plinth comes in cubic, tall, and low varieties, as well as a small range of colours including the new brown grey. The heaviness of the Plinth marble stands in contrast to the honed surface; light bounces off of the angles and falls across the tops, producing a spotlight-effect in any space. Though the lines of the podiums are sharp and clean, the naturalness of the marble is at the forefront of its visual identity, creating an intriguing contrast within each piece. From a side table in a private home to a place to display a vase of flowers in a restaurant, Plinth podiums provide an unparalleled surface.

All Plinth marble is handcrafted in a small factory in Portugal. Each piece of carefully selected marble is assembled by hand to ensure that the sides line up perfectly. The result is podiums that are consistent in shape and quality while unique in marbling pattern.

The black marble, called Nero Marquina, comes from the north of Spain, while the white marble, known as Carrara, comes from Italy. The new addition of brown grey marble, called Grey Kendzo, is from Iran. All share a low refraction index, so they allow light to penetrate a few millimetres into the surface before shattering, giving the Plinth its aura of vitality. By utilising simple shapes and the highest possible quality control, MENU allows the marble to speak for itself.

Each piece of carefully selected marble is assembled by hand to ensure that the sides line up perfectly. The result is podiums that are consistent in shape and quality while unique in marbling pattern.

About the Designer

Norm Architects, founded in 2008 by Jonas Bjerre-Poulsen and Kasper Rønn, has worked within residential architecture, commercial interiors, industrial design, photography, graphics and art direction since its inception. The name 'Norm' signifies the importance of drawing inspiration from norms and traditions within the fields of architecture and design, which have been refined throughout the centuries. Making it a virtue of focusing on quality, durability and timelessness, Norm's objective is to produce design that applies good materials and craftsmanship while also embodying beauty, traditions, history and more importantly, timeless simplicity.

Plinth

Production Process

3Inner construction made by solid acacia wood. 1,5 cm thick marble plates are then glued to the sides and top of the inner construction.

Materials

- Black Marquina Marble
- Grey Kendzo Marble
- White Carrara Marble
