About the designer – String Furniture

For a number of years, the production of String® was non-existing. The years passed by and it was not until 2004 the brand revived. It was during this time String®, as we know the brand today, took form. The assortment was carefully revised and new features for the shelving system were designed and developed. The updated and now modern shelving system was here to stay! Over a night, String® was once again considered an obvious part of the timeless Scandinavian design style
