

VIPP455 & 455+

# Swivel chair

## PRODUCT DESCRIPTION

The Vipp455 and 455+ Swivel chairs present refined seating options for the executive office, design-focused workspace or conference room. This executive model features a tall backrest and an enlarged seat with extra padding while keeping the light, architectural aluminium frame. Resting on a four or five-legged base with either castors or floor gliders, the chairs allow for smooth 360° rotation.

Both editions are available in a range of curated upholsteries in leather and textile or in bespoke upholstery chosen by the customer. The leather-upholstered editions include armrest pads.

The 455+ version is designed with adjustable seat height and a tilt function.

Swivel chair

KEY SELLING POINTS

Extra comfort

Compared to the original Swivel chair, the Vipp455 and 455+ chair feature an elongated backrest, adding comfort as well as balance to the enlarged seat. The core of the seat is built from a firm structure of braided belts and wood, wrapped in dense layers of foam, creating a construction that is soft yet firm and ensures comfort for people of all shapes and sizes.

In motion

This executive edition of the Swivel chair is intended for the office and professional conference rooms that require extended seating time. Designed with a swivel base, this chair in motion will provide a flexible seating experience throughout the day.

Height adjustment

The 455+ chair is designed with an adjustable height position to accommodate various seating heights.

Tilt mechanism

The 455+ chair features a built-in tilt mechanism that automatically adjusts to the sitter's position, ensuring a smooth experience when seated. The tilt cannot be manually adjusted or locked in a fixed position.

Sit. Spin. Turn.

The soft seat rests elegantly on a pillar that branches out in a four or five-legged base on either castor wheels or floor gliders allowing for a 360° seat rotation.

Industrially framed

The slender armrests continue straight into the padded backrest, giving the chair an almost airy expression despite its solid components.

Padded armrest

On leather-upholstered chairs, armrest pads in aniline leather add sophisticated detailing and soft comfort.

Bespoke upholstery

The Bespoke Swivel concept allows customers the freedom to tailor the chair according to their own interior vision. Available with best industry lead times, Swivel chairs upholstered in specially selected fabrics, balance the characteristic, industrial silhouette with a bespoke, tailored expression.

PRODUCT MATERIALS  
& SURFACE TREATMENT

Polished aluminium frame.

Upholstery with leather or textile.

The core of the seat is built from a firm structure of braided belts and wood, wrapped in dense layers of foam.

PRODUCT CHARACTERISTICS  
& MAINTENANCE

Characteristics

Textile

Opting for textile upholstery, Vipp's Tide fabric adds a warm embrace to the cool, metal silhouette. A refined blend of linen and wool, Tide has a crisp yet warm softness. The Vipp curated textile is made of 55% linen, 35% wool, and 10% polyamide.

Leather

The 455 and 455+ chairs are available in Vipp's signature leathers, Camel, Black, and Bosco. The high-quality aniline leather is a vibrant material, and natural marks are to be expected.

Maintenance

Textile

For daily cleaning, use a vacuum with a soft brush or wipe the upholstery with a clean, dry cloth. Use only very little water and not too warm. Be careful not to rub the seat, just wipe gently. For cleaning of the frame, use a clean, dry cloth.

Leather

In order to maintain the soft and supple quality of the leather, it is important to treat the aniline leather with a leather conditioner. It is important to keep leather out of direct sunlight as this can bleach and dry out the leather. Do not use chemical or normal cleaning products on leather, as this might destroy the leather, only aforementioned leather conditioner and cleaning. For daily cleaning, use a vacuum with a soft brush or wipe the leather with a clean, dry cloth.

TESTING & SUSTAINABILITY

Testing

EN 16139 - L2 ANSI/BIFMA X5.4-2020.  
Foam fire resistant according to BS 5852 (Crib 5) and CAL TB 117.

Sustainability

Chrome-free leather.  
Life Cycle Assessment in progress.
